

NullPing Cash

Feature summary and known limitations

Prepared for management · 26 August 2026 · Activate. Publish. Get traffic.

1. Feature summary

NullPing Cash is affiliate software for beginners. A member picks a product, the app builds a hosted review-style **money page**, prepares **Pinterest pin** assets that send traffic to that page, and shows **real visits and clicks** in Results. Members still review, publish, and post by hand.

Core workflow

Step	What the member does	What the product does
1. Activate Asset	Paste a product URL or name (optional affiliate link)	Builds a full money page (headline, benefits, pros/cons, FAQs, CTAs)
2. Publish	Preview, pick a theme/style, edit if needed	Hosts the live page at /m/{slug}
3. Generate Traffic	Request pin packs	Creates 10 pins per run (image + title + description + tracking link)
4. Results	Check activity	Shows real visitors, affiliate CTA clicks, and per-asset stats

Supporting tools: Links Library (save/reuse affiliate URLs), Academy (tutorials + FAQ), Support, Account.

Premium upgrades

1. **Unlimited** — ~200 ready-made money pages. Install with an affiliate link; each install includes 10 Pinterest pins.
2. **Done-For-You Profit** — One run from link + niche → live page, 3 pins, an authority article, and 3 Facebook posts.
3. **Instant Income** — ~10 Facebook post variants from a live money page. Copy/paste to Facebook; visits track with ?src=facebook.
4. **Automated Profits** — Checklist of ~180 traffic sources across 9 niches. Guided manual posting, not auto-posting.
5. **Guaranteed High-Ticket Payouts** — Add long-form authority sections to a money page from 100+ guides.

6. **Cyber Protection** — Account health check (email confirmation, session, HTTPS, recent activity). Not antivirus.
7. **Reseller & License Rights** — Request turnkey reseller activation; team unlocks after review.

2. Known limitations

What the app does not do

- Does **not** auto-post to Pinterest or Facebook. Pins and posts are download / copy-paste.
- Does **not** show commissions, conversions, or earnings. Those live on the merchant/affiliate network.
- Does **not** provide a full analytics suite. Results are bot-filtered visits and CTA clicks (user-agent filtering), not enterprise tracking.
- **Automated Profits** is a posting checklist, not set-and-forget autoposting.
- **Cyber Protection** is account/session status, not security software.

Product and operations constraints

- Pin generation cap: **5 runs per day** (resets midnight UTC), **10 pins** per run.
- Pin images are **template-composited** (headline over a product photo or branded gradient), not AI illustrations.
- If RAPIDAPI_KEY is missing, money pages and pins still generate using **local fallback copy**.
- **Reseller & License Rights** is a request, not instant. Typical unlock is hours, up to ~48 hours when busy.
- **Scale Training** exists in the codebase but is **turned off** in this product.

Training and launch gaps

- In-app dashboard and Academy **Vimeo IDs are empty**. Members currently see “Training video coming soon” until IDs are added.
- Production URL is not documented in launch notes yet (NEXT_PUBLIC_APP_URL must be set at deploy).
- Price is not stored in the app repo (lives in the sales funnel).

Guarantee: 30-day refund, no questions asked (Support policy).
